ABOUT ME

Frontend Developer with 3 years of experience building responsive, scalable web apps using **React.js, JavaScript (ES6+), HTML5, CSS3, and Redux**. Skilled in writing clean, unit-tested code, **integrating RESTful APIs, and collaborating in Agile/Scrum teams**. Proficient with Git, component-based architecture, and optimizing performance for cross-browser compatibility.

SKILLS

Frontend Technologies:

React.js, Redux, JavaScript (Fundamentals + ES6), HTML, CSS, Material UI, Core UI, Bootstrap, AJAX, jQuery, JSX

Backend & API:

Python, Django, MySQL, Postman

Version Control & Tools:

Git, GitHub, npm

Development Practices:

Responsive Web Design, Debugging, Unit Testing

EXPERIENCE

Product Engineer

Frugal Scientific

May 2023 (Present..)

As a Frontend Developer, I was responsible for building and integrating multiple modules within a logistics and supply chain management platform. My focus was on developing scalable, responsive, and user-friendly interfaces that enhanced performance, streamlined workflows, and supported key business operations across finance, booking, RFQ management, and user support.

- Designed centralized RFQ and Job Dashboards for efficient quotation and job tracking.
- Created RFQ Listings with advanced filters, search, and action controls.
- Developed layouts for Dashboard Tasklist, Vendor Listings, and Service Lists.
- Built a real-time Notification System for approvals, tasks, and alerts.
- Designed a Support Module with integrated ticketing for issue management.
- Built Job Tasklists with detailed task breakdowns and status tracking.
- Implemented detailed Job Tasklists with live status tracking.
- Developed Service Booking tabs for cost/revenue approvals and data entry.
- Integrated shipping flows: Pre-Carriage, Main Carriage, and On-Carriage stages
- Built billing modules for payments, receipts, credit/debit notes, and invoices.
- Created a financial dashboard for billing insights and monitoring.
- Developed CRM components to display key customer data and metrics.
- Implemented user management with create, update, activate/suspend, and reset.
- Built operations monitoring screens for real-time visibility.
- Integrated a role-based support ticket system for smooth issue handling.
- Developed customer finance module for receivables and bulk payments.
- Built vendor finance module for payables and bulk transactions.

Frontend Developer Intern

Dec 2022 - May 2023

Full Stack Developer Academy

Built responsive and visually appealing web applications using HTML, CSS, Bootstrap, and JavaScript, ensuring a seamless user experience across various devices and platforms. Created user-centered interfaces focusing on precision, interactivity, and usability, providing a positive and intuitive user experience. Utilized modern JavaScript features (ES6+) to craft clean, efficient, and scalable code, taking advantage of the latest language advancements. Designed and developed high-performance back-end services with Node.js and Express, providing RESTful APIs for CRUD operations and data management. Implemented data persistence and retrieval strategies using MongoDB and MySQL, ensuring data integrity and optimizing query performance.
